Sequence 263. Application US/09170496D

Sequence 263. Application US/09170496D

Patent No. 6555339

GENERAL INFORMATION:
APPLICANT: Behan, Dominic P.
APPLICANT: Chalmers, Derek T.
APPLICANT: Law, Chen W.
TITLE OF INVENTION: No. 655539-Endogenous, Constitutively Activated Human G Protein TITLE OF INVENTION: Receptors
FILE REFERENCE: AREN-0040

CURRENT APPLICATION NUMBER: US/09/170,496D

CURRENT FILING DATE: 1998-10-13

NUMBER OF SEQ ID NOS: 294

SOFTWARE PATENTIN Version 3.1

SEQ ID NO 263

LENGTH: 2724
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            GCTCTGACATACATTCCCAAGGGAGCATTCACTGGCCTTTACAGTCTTAAAGTTCTTATG 360

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 263, P

US-09-949-016-16154

Sequence 16154, Application US/09949016

Sequence 16154, Application US/09949016

Patent No. 6812339

GENERAL INFORMATION:

TITLE OF INVENTION: POLYMOKENISMS IN KNOWN GENES ASSOCIATED

TITLE OF INVENTION: WITH HUMAN DISEASE, METHODS OF DETECTION AND USES THEREOF

FILE REPRENSICE: CLOL01307

CURRENT APPLICATION NUMBER: US/99/949,016

CURRENT PILING DATE: 2000-04-14

PRIOR APPLICATION NUMBER: 60/241,755

PRIOR PAPLICATION NUMBER: 60/237,768

PRIOR PELING DATE: 2000-10-03

PRIOR FILING DATE: 2000-10-03

PRIOR FILING DATE: 2000-09-08

NUMBER OF SEQ ID NOS: 207012

SEQ ID NO 16154

LENGTH: 22339

Heu S.Y., Liang S.-G., Heuch A.J.W.;

"Characterization of two LGR genes homologous to gonadotropin and thyrotropin receptors with extracellular leucine-rich repeats and a G protein-coupled, seven-transmembrane region.";

Mol. Endocrinol. 12:1830-1845(1998).

-I FUNCTION: Orphan receptor. It may be an important receptor for signals controlling growth and differenciation of specific embryonic tissues (By similarity).

-I SUBCELLULAR LOCATION: Integral membrane protein.

-I TISSUB SPECIFICITY: Expressed in skeletal muscle, placenta, spinal cord, and various region of brain.

-I SIMILARITY: Belongs to the G-protein coupled receptor 1 family.

-I SIMILARITY: Contains 17 leucine-rich (LRR) repeats.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            28-FEB-2003 (Rel. 41, Last sequence update)
